## DATA SHEET

**Commodity:** Activated Alumina

**Type:** WHA-108

**Applications**

This type is  $\gamma$ -aluminum oxide micro sphere which is lightly soluble in acid and alkali , insoluble in water

Widely used in discolor purification of organic liquid phases

**Specifications:**

Particle Size	50-100 Mesh
Bulk Density min g/cm <sup>3</sup>	0.75
Specific area surface m <sup>2</sup> /g min	300
Pore Volume cm <sup>3</sup> /g min	0.38
Na <sub>2</sub> O: % max	1.0
